Biometric Authentication System (BAS-EPSS)

Release Notes

Release Date	Version	Release Type
22/10/2026	V1.0.1 Build 221026	Critical

Version:1.0.1 Build221026

1. **Security Patch:** A security patch has been applied to Baseline Platform to address identified vulnerabilities affecting the underlying environment.

   The update was implemented as part of our ongoing security maintenance and vulnerability management process. Relevant system functionality and services were verified following the patch deployment.

   Detailed technical information relating to the platform configuration and security implementation is maintained internally and may be provided to authorised parties where required.

Customer Impact and Recommended Action

This update includes functional and compatibility improvements and will be applied upon patching update after the effective date. We apologize for any inconvenience caused by changes to existing usage habits.

Please note that some new features introduced in this release are only available for customers who have purchased the corresponding modules. Availability may vary based on your system configuration and license purchased.

AUPRO reserves the right to change, alter or withdraw the above notification without prior notice. Product design and specifications are subject to change without prior notice.

If you have any questions or requests, please contact our technical support team at support@aupro.com.sg
